

Day 7 (13-02-2026)

1. setTimeout Example (Asynchronous Execution)

```
console.log("Program Start");

setTimeout(function(){
  console.log("This message appears after 2 seconds");
}, 2000);

console.log("Program End");
```

Output order

Program Start

Program End

This message appears after 2 seconds

2. Callback Function Example

```
function processUser(name, callback){
  console.log("Processing user:", name);
  callback();
}

function done(){
  console.log("User processed successfully");
}

processUser("Keerthi", done);
```

3. Promise Example

```
let task = new Promise(function(resolve, reject){

  let completed = true;

  if(completed){
    resolve("Task completed successfully");
  }
  else{
    reject("Task failed");
  }

});

task
```

```
.then(result => console.log(result))  
.catch(error => console.log(error));
```

4. Async / Await Example

```
function getData(){  
  return new Promise(resolve => {  
    setTimeout(() => {  
      resolve("Data received from server");  
    }, 2000);  
  });  
}
```

```
async function displayData(){  
  let data = await getData();  
  console.log(data);  
}
```

```
displayData();
```

5. Fetch API Example

```
fetch("https://jsonplaceholder.typicode.com/posts/1")  
.then(response => response.json())  
.then(data => {  
  console.log("Post Title:", data.title);  
});
```
