

Day 11 (19-02-2026)

1. Connecting Node.js with MongoDB

```
const { MongoClient } = require("mongodb");

const url = "mongodb://localhost:27017";
const client = new MongoClient(url);

async function connectDB(){
  await client.connect();
  console.log("Connected to MongoDB");
}

connectDB();
```

2. Insert Data into MongoDB

```
const { MongoClient } = require("mongodb");

const url = "mongodb://localhost:27017";
const client = new MongoClient(url);

async function insertData(){
  await client.connect();
  const db = client.db("testdb");
  const collection = db.collection("users");

  await collection.insertOne({name: "Keerthi", age: 21});
  console.log("Data inserted");
}

insertData();
```

3. Fetch Data from MongoDB

```
const { MongoClient } = require("mongodb");

const url = "mongodb://localhost:27017";
const client = new MongoClient(url);

async function getData(){
  await client.connect();
  const db = client.db("testdb");
  const collection = db.collection("users");

  const data = await collection.find().toArray();
```

```
    console.log(data);  
}
```

```
getData();
```
