

Day 13 (23-02-2026)

Functional Component Example

```
function Header() {  
  return <h1>Welcome to My React App</h1>;  
}
```

```
export default Header;
```

Using Components in App.js

```
import Header from "../Header";
```

```
function App() {  
  return (  
    <div>  
      <Header />  
      <p>This is a React component example.</p>  
    </div>  
  );  
}
```

```
export default App;
```

Class Component Example

```
import React, { Component } from "react";
```

```
class Greeting extends Component {  
  render() {  
    return <h2>Hello from Class Component</h2>;  
  }  
}
```

```
export default Greeting;
```
