

Day 14 (24-02-2026)

Props Example

```
function Welcome(props) {  
  return <h2>Hello {props.name}</h2>;  
}
```

```
export default Welcome;
```

Using Props in App Component

```
import Welcome from "./Welcome";
```

```
function App() {  
  return (  
    <div>  
      <Welcome name="Keerthi" />  
      <Welcome name="React Learner" />  
    </div>  
  );  
}
```

```
export default App;
```

State Example

```
import { useState } from "react";
```

```
function Counter() {  
  const [count, setCount] = useState(0);  
  
  return (  
    <div>  
      <p>Count: {count}</p>  
      <button onClick={() => setCount(count + 1)}>Increase</button>  
    </div>  
  );  
}
```

```
export default Counter;
```
