

Day 16 (26-02-2026)

Button Click Event

```
function ClickExample() {  
  
  function handleClick(){  
    alert("Button Clicked");  
  }  
  
  return (  
    <button onClick={handleClick}>  
      Click Me  
    </button>  
  );  
}  
  
export default ClickExample;
```

Counter Example using Event

```
import { useState } from "react";  
  
function Counter() {  
  const [count, setCount] = useState(0);  
  
  return (  
    <div>  
      <h2>Count: {count}</h2>  
      <button onClick={() => setCount(count + 1)}>  
        Increase  
      </button>  
    </div>  
  );  
}  
  
export default Counter;
```

Input Event Example

```
import { useState } from "react";  
  
function InputExample() {  
  const [name, setName] = useState("");  
  
  return (  
    <div>
```

```
<input
  type="text"
  onChange={(e) => setName(e.target.value)}
  placeholder="Enter name"
/>
<p>Hello {name}</p>
</div>
);
}

export default InputExample;
```
