

Day 5 (11-02-2026)

Creating and Accessing an Array

```
let fruits = ["Apple", "Banana", "Mango", "Orange"];
```

```
console.log(fruits);  
console.log("First Fruit:", fruits[0]);  
console.log("Second Fruit:", fruits[1]);
```

Output

Apple
Banana

2. Array Methods Example

```
let numbers = [1, 2, 3];
```

```
numbers.push(4); // add element  
numbers.pop();   // remove last element
```

```
console.log(numbers);
```

Output

[1, 2, 3]

3. Loop Through an Array

```
let colors = ["Red", "Blue", "Green"];
```

```
for(let i = 0; i < colors.length; i++){  
  console.log(colors[i]);  
}
```

Output

Red
Blue
Green

4. JavaScript Object Example

```
let student = {  
  name: "Keerthi",  
  age: 21,  
  course: "Computer Science"  
};
```

```
console.log(student.name);  
console.log(student.course);
```

Output

Keerthi
Computer Science

5. Adding Property to Object

```
let person = {  
  name: "Ravi",  
  age: 25  
};
```

```
person.city = "Bangalore";
```

```
console.log(person);
```

Output

```
{name: "Ravi", age: 25, city: "Bangalore"}
```

6. Array of Objects Example

```
let students = [  
  {name: "Asha", marks: 80},  
  {name: "Rahul", marks: 75},  
  {name: "Kiran", marks: 90}  
];
```

```
console.log(students[1].name);  
console.log(students[2].marks);
```

Output

Rahul
90
