

Day 15 (25-02-2026)

useState Example

```
import { useState } from "react";

function Counter() {
  const [count, setCount] = useState(0);

  return (
    <div>
      <h2>Count: {count}</h2>
      <button onClick={() => setCount(count + 1)}>Increase</button>
    </div>
  );
}

export default Counter;
```

useEffect Example

```
import { useEffect } from "react";

function Message() {

  useEffect(() => {
    console.log("Component Loaded");
  }, []);

  return <h2>useEffect Example</h2>;
}

export default Message;
```

Combining useState and useEffect

```
import { useState, useEffect } from "react";

function Timer() {
  const [time, setTime] = useState(0);

  useEffect(() => {
    setInterval(() => {
      setTime(t => t + 1);
    }, 1000);
  }, []);
}
```

```
    return <h2>Time: {time}</h2>;  
  }
```

```
export default Timer;
```
