

Day 21[08-03-2025]

Node.js API Example

```
const express = require("express");
const app = express();

app.get("/api/message", (req, res) => {
  res.json({ message: "Hello from Backend API" });
});

app.listen(5000, () => {
  console.log("Server running on port 5000");
});
```

React Fetch API Example

```
import { useEffect, useState } from "react";

function App() {
  const [message, setMessage] = useState("");

  useEffect(() => {
    fetch("http://localhost:5000/api/message")
      .then(res => res.json())
      .then(data => setMessage(data.message));
  }, []);

  return (
    <div>
      <h2>{message}</h2>
    </div>
  );
}

export default App;
```
